Work Experience

Fill Station - Dump Station Swing, Wrap Room

12/2023 to Present
Brewster Cheese
Stockton, IL

I have worked at Brewster Cheese since December and have gained a lot of experience in a short amount of time. I began as a third shift fill station and have progressed to the wrap room. I have worked as a lead in both Fill station and Dump station and have taken on responsibilities above and beyond my required duties. I have also been tasked with training new employees and have been successful in helping the trainees learn the correct way of completing their duties.

Head Baker

05/2023 to 11/2023

Shipley's Do-Nuts

Aurora, CO

I started as a Fryer/Cashier, and eventually learned all the positions within the company. This earned me a promotion to the position of Head Baker, which is a key holder position and included opening, closing, and ensuring the daily operations ran smoothly. I was also tasked with administrative duties such as accounting (balancing cash drawers) and running daily and weekly reports. I was offered a management position after only three months of employment, and declined only due to the fact that I would be moving out of state within the next year.

Specialized Laborer

05/2022 to 10/2022

Armex Construction & Design Studio of Southwest Florida

Cape Coral, FL

I reported directly to the owner of the company who assigned my daily tasks. My work week consisted of demolition and remodeling of high end commercial and residential properties within a small team setting. As a Specialized Laborer, I was responsible for ensuring the quality of work performed by General Laborers. This included, but was not limited to, plumbing, electrical, carpentry, brick laying, roofing, window installation, appliance installation, and finishing. I really enjoyed my time here as I learned many new skills and flourished in my position.

Traveling General Laborer

07/2021 to 04/2022

Capitol Construction LLC

Plainfield, IL

I started as an entry level laborer, closely supervised by my Project Manager, until I gained the necessary skills and knowledge to temporarily fill in for superintendents during their absence. My day-to-day duties included general labor ranging from carpentry, demolition, electric, and many other industry related tasks. I was taught to keep my work area clean and organized, maintain the condition of my tools for safety, and to respect and be responsible for the customers' property. What I most enjoyed about this job was getting to travel to new states and experiencing different construction styles.
